Aeroflot Today – #1 Russian Carrier with a Global Network

1. **#1 airline in one of the fastest growing global markets** with leading positions on both domestic and international routes

2. An expanding **global network with 141 destinations in 54 countries** (incl. Russia)

3. **Best product and customer experience** in our markets

4. Multi-brand offering to reach **the full customer spectrum and meet demand across geographies**

5. **Modern, efficient fleet – one of the youngest in Europe**

6. Solid track record of delivering **positive financial results and shareholder returns**

7. **Strong financial and organisational platform** and clear **strategy for future profitable growth**

---

1. Without code sharing.
Major developments over the past 5 years strengthened Aeroflot’s position and created the platform for future growth.
Aeroflot delivered impressive growth over the last decade and is envisaging further profitable growth through leadership in the Russian market and consistent improvement in operational efficiency.
Strategic Overview: Market Dynamics and Aeroflot’s Approach

Giorgio Callegari
Deputy CEO for Strategy and Alliances
Key Highlights

- Emerging market players will continue to enjoy higher than global average passenger traffic growth in the upcoming decades, with Russia being no exception:
  - Russian airline industry benefitting from ongoing consolidation and modernisation of aviation infrastructure and developing in sync with key global market trends
  - Aeroflot is well positioned to compete with international carriers and increase its market share

- Aeroflot – a Russian market leader with its business model matching best practices of leading airline groups:
  - Aeroflot is leading the consolidation of the Russian market, establishing a flagship airline group
  - Consolidation increased regional penetration and is a basis for a multi-brand business model to serve a broad range of customer segments
  - Moscow transit hub’s attractiveness stems from its unique geographic position – on a crossroad connecting global cities
  - Profitable growth strategy to deliver sustainable shareholder returns
Global Air Transportation: 2014 a Rebound Year

**Demand: European PAX Growth Accelerating in 2014**

- Positive GDP outlook and accelerating passenger traffic are expected to translate into gradually expanding industry profitability in the mid-term

**Supply: European ASMs\(^1\): Risk for 2014?**

**Jet Fuel Prices: Further Decline Possible in 2014**

**Improving EBIT Margin of the Air Transportation Industry, %**

**Russia’s Middle Class is Set to Continue to Grow**

- **Air travel penetration in Russia is set to catch-up with the levels observed in developed markets.**
  - The trend is supported by demand from the Country’s expanding middle class.

2. UK and EU-27 data is as of 2011, US data is as of 2012, Russia data is as of 2013.
3. Includes traffic to/from China.
Russian Market Trends: Domestic Traffic

- **Consolidation**
  - Russia's air travel industry is dominated by large players while smaller players are focusing on regional and leisure segments
  - Large carriers built market share by improving quality of services and acquiring / developing selected regional and charter airlines

- **Regional Airport Infrastructure Development**
  - Russian Government has introduced new regulations and initiatives to sustain the development of regional networks
  - Several Russian and international airport operators have been consolidating infrastructure ownership. This in turn has translated into increased quality of service and cost optimisation
  - The improving economic conditions in the Russian regions are leading to a surge of personal income, population mobility and regional demand for traveling to tourist destinations. This demand in turn stimulates charter and regional airline development

- **Market Segmentation**
  - To ensure fleet optimisation and sustainable profitability, the majority of Russian airlines shifted from running scheduled and non-scheduled flights simultaneously to offering just one type of flight to their customers
  - Rising demand for travel at competitive prices and improving regulatory conditions has enabled the emergence of “low-cost” operations
  - A number of airlines currently cater only to leisure passengers on a standalone basis or as part of large tourism and travel companies

- **Integration of Russian Air Transportation into Global Market**
  - Several network carriers improved their quality of service and operational efficiency by joining global alliances (Aeroflot – SkyTeam, S7 – OneWorld)
  - Moscow airports are emerging as transit hubs within the global landscape

---

**The Russian airline industry is developing in sync with key global market trends. The industry is also benefitting from ongoing consolidation and the modernisation of aviation infrastructure**
Russian Market Trends: International Traffic

**Liberalization of Routes**
- Gradually increasing number of airlines flying on international routes to/from Russia as a result of inter-governmental agreements

**Europe**
- Gradual rise in passenger traffic
- Increased competition from LCC carriers on short-haul European routes: Aeroflot’s superior product quality and competitive cost structure is a winning factor

**Regional**
- Gradual rise in passenger traffic
- Rapidly growing transit traffic from CIS countries via Moscow

**Asia**
- Significant rise in passenger traffic
- South Korean carriers actively serving Russia’s Far East, integrating it into the Asia-Pacific network

**Foreign Low-Cost Competition**
- European low-cost carriers penetration into the Russian market has been moderate so far
- Middle East low-cost carriers focus mostly on the leisure segment from large Russian cities

- **Russian market continues to be attractive to foreign airlines**
- **Aeroflot is well positioned to compete and increase its market share**
Moscow as a Transit Hub

Moscow’s Geographical Position

- Moscow is well positioned to capture transit traffic on key routes connecting global markets

Shortest geographical distance for selected key routes

Transit Passenger Traffic of JSC Aeroflot in Sheremetyevo

- **2011**: 4.2 m PAX
- **2012**: 5.7 m PAX
- **2013**: 7.3 m PAX

Aeroflot Proposition to Transit Passengers

- **Premium service of consistent quality across both short and long-haul routes offered to meet international passengers’ expectations**
- **Ground experience: focus on improving passenger transit experience on the ground (e.g. decrease minimum connecting time, invest in transit services)**

- **Aeroflot’s hub attractiveness stems from its unique geographic position – located at a crossroad connecting global markets**
Aeroflot: a Market Leader

Domestic and International Passenger Traffic in Russia (2013)

- Largest market share in Russia exceeding the combined market share of the 3 most sizeable competitors
- Market size is set to increase as a result of implementing multi-brand strategy

Network

- Well-balanced network
- SVO hub in Moscow, with special focus on St. Petersburg, Vladivostok, Rostov-on-Don and Sochi

Fleet

- The youngest fleet in Russia and one of the youngest in Europe (Aeroflot JSC)
- Modernisation and simplification of subsidiaries’ fleets aimed at cost optimisation

Premium Offering

- Premium Russian carrier, with quality of services recognised by numerous international and domestic awards
  - SkyTrax named Aeroflot as the best airline in Eastern Europe (2013) (winner for multiple times)

Further Growth

- Aeroflot’s strategy – to be among top 20 global airlines internationally and a leading-carrier domestically by:
  - Establishing strategic partnerships with global leaders
  - Capitalizing on emerging LCC market in Russia (Dobrolet)
  - Increasing penetration within regional markets (Donavia, Aurora, Rossiya)
- Aeroflot is well positioned to benefit from further consolidation

Over the last decade, Aeroflot has transitioned from “one of the many” market players to the market leader

Source: TCH
2025 Strategy

LEADING GLOBAL AIRLINE

- Top 5 European and top 20 global airline group by revenue and passenger turnover
- 70m passengers per year, 30m domestically
- Extensive customer reach and broad market penetration
- Sustainable returns to shareholders

1. Multi-brand Strategy
2. Global Network
3. Strategic Partnerships
4. Innovation/Operational Improvement
5. Sustainable Profitability
## Multi-brand Strategy: Capturing Demand Across Segments and Geographies

<table>

SkyTeam membership and code share agreements allow Aeroflot to increase presence on existing markets and enter new markets.
Strategic Partnerships: a New Approach

Global Partnerships is a Means to Achieve 2025 Targets

- Strategic Partnerships
  - Setting-up a number of strategic partnerships with leading airlines globally

- Global Alliances
  - Aeroflot as a Member of SkyTeam

- Available Resources
  - Including code share agreements

Key Benefits and Implications

1. Offer new code share itinerary options
2. Leverage strategic partners’ sales
3. Combine strategic partners’ competitive positions in large markets
4. Leverage strategic partners’ (already) high market share
5. Synchronise schedules on frequently served routes
6. Rationalise service in high-frequency markets
7. Synchronising network to/from jointly-served markets

- Increase in Market Share
- Improve Yield
- Reduce Cost

- Aeroflot is actively developing strategic partnerships with multiple global carriers to increase its competitive position, brand visibility and increase economies of scale
# Innovation / Operational Improvements

## Innovation Programme Overview

**Planning and implementation process**

- Cooperation with research organizations, R&D businesses and universities
- Innovative solutions and tools within the air travel industry
- Technological, managerial and organizational innovations

**Evaluation and monitoring of results**

- Customer Experience Improvements
  - Increasing customer satisfaction and loyalty
  - Applying service personalisation
- Operational Improvements
  - Cost optimisation
  - Enhanced efficiency and reliability of MRO service
  - Integration and efficient coordination of network operations and ground services

## Key Focus Areas

**Integrated systems in major areas of operations**

- Implementation of Oracle Siebel Loyalty Management solutions to manage and develop relationships with clients and Frequent Flyer Programme (FFP) members
- Introduction of the most important measures to retain and increase customer loyalty

**IT infrastructure and IT solutions**

- Implementation of SAP ERP and Data Processing Centre
- Creation of a unified system of ticket sales and jet fuel procurement
- Unification and integration of all Aeroflot Group information systems

**Aeroflot’s Innovation programme aims to introduce the newest processes, technologies and solutions to optimise operations and enhance customer experience**
Sheremetyevo Expansion as a Base for Aeroflot’s Development

Summary Overview

- Sheremetyevo is expected to become one of the leading airports in Europe as a result of the implementation of a two-stage expansion programme

  - **Stage 1 to be completed by 2017**
    - Third runway construction (length: 3,200 metres, width: 60 metres; able to host all types of aircraft)
    - First stage of North Terminal reconstruction and opening of underground tunnel connecting North and South terminals
    - Airport capacity to grow up to 42m PAX p.a.
    - Northern Terminal complex capacity to reach 32m PAX p.a. upon first stage completion

  - **Stage 2 to be completed by 2030**
    - Further development of the second landing area
    - New terminal facilities with capacity of 64m PAX p.a.
    - Total cargo traffic of up to 1,115m tons

- Sheremetyevo is set to become one of the most modern airports in Europe, increasing Moscow’s attractiveness as a transit hub for international passengers and providing a solid foundation for Aeroflot’s long-term strategy
Summary: the Path to Value Creation

Increased Profitability
- Strong operating leverage based on efficient fuel cost structure and high labour productivity
- Improving capacity utilisation
- Further customer segmentation to maximise yields

Network Development
- Network expansion to improve global connectivity:
  - Network optimisation: increased frequencies on the most attractive routes
  - Network expansion: selected new routes to increase market penetration
  - Development of SVO hub in Moscow, as well as regional hubs in St. Petersburg, Vladivostok, Rostov-on-Don and Sochi

Rising Market Share
- Expanding network served by top-tier fleet expected to translate into strengthening market position domestically and internationally

Fleet Expansion
- Fleet expansion to match network development
- Ongoing fleet modernization

Aeroflot plans to deliver profitable growth, strengthening its leading position in the domestic and international markets
Dobrolet: Project Update

Giorgio Callegari
Deputy CEO for Strategy and Alliances
## Dobrolet Project Summary

### Price, safety and schedule are three top priorities for selecting an airline by Russian passengers

### Dobrolet will serve customers currently outside Aeroflot’s reach

### Corporate Structure
- Stand-alone 100% subsidiary
- Lean organisational structure
- Clear governance relationship between the subsidiary and parent company

### Management Team
- Strong and experienced management team led by Vladimir Gorbunov who has significant experience in the Russian airline industry

### Aircraft Type
- Standardized modern fleet of new Boeing 737-800 NG
- Simple cabin with increased density of seats (189 per plane)

### Fleet Size
- 8 aircraft in place in 2014
- Expanding to 40 aircraft by 2018

### Fleet

### Routes Network
- 11 routes in Russia in 2014
- Expanding to 27 routes by 2016
- Expansion to CIS and international markets from 2016

### Passenger Traffic
- 10m passengers by 2018

### Product Offering
- A typical LCC offering to attract price sensitive customers
- Substantially different from Aeroflot's product proposition

### Ticket Pricing Discount
- 20-40% discount compared to fares of “traditional” carriers
- Majority of tickets are non-refundable
- Sales of tickets via direct or online channels

### Product and Prices

### Network and Market

### Company Overview

---

Aeroflot Capital Markets Day 2014
Dobrolet’s Customer Proposition: a Typical LCC Product with Tight Cost Control

| Aircraft | Fleet | 1 type |
| Boarding Pass | $* |
| Allocated Seat | $ |
| Priority Boarding | $ |
| Checked Bag | $ |
| Carry-On | 55x40x20 |

| On Board | Meals | $ |
| Audio / Video | X |
| Magazine (upon request) | ✓ |

| Ticket Purchase | Refundable | X |
| Frequent Flyer Programme | $* |
| % Direct Sales | ~100% |

Sources of Cost Advantage

- **Fuel**
  - Brand new fleet with high fuel efficiency
  - Economies of scale in fuel purchases

- **Labour**
  - Flat and lean organizational structure
  - Only ~80 admin staff at the date of first flight

- **Aircraft / Traffic Servicing**
  - High aircraft utilization rate
  - Single class cabin

- **Maintenance**
  - Standardised fleet and efficient maintenance programmes
  - Outsourcing and strict control of MRO costs

- **SG&A**
  - Low cost discipline in company’s daily operations
  - Primary use of online sales channels

- **Operating Leasing/Financing**
  - Leveraging Aeroflot relationship with lessors

- **LCC product will be substantially different from Aeroflot’s proposition and will attract price sensitive passengers**
In the First 3 Years, Dobrolet will Fly to the Most Promising Destinations Domestically and Selected International Destinations

Key Selection Criteria for Domestic Market

1. Top 150 Russian air and rail routes by PAX traffic
2. Air PAX traffic allows at least 3 frequencies per week
3. Flight distance is longer than 400km
4. Airports have no limitations for A320/B737

- Revenue enhancing and cost efficient approach to roll-out of domestic network
- Starting from year 3 Dobrolet network development will also include international routes

36 destinations over 5 years
Minimising Impact on Existing Aeroflot Customer Base

1. Dobrolet will be a typical low-cost product which is substantially **different from Aeroflot’s** proposition

2. Dobrolet will start flying **from a different Moscow airport** than Aeroflot currently operates in

3. Dobrolet will focus only on **point to point economy passengers** so Aeroflot transit passengers and business class passengers will not be affected

4. Dobrolet will capture **additional demand** for low cost carrier services on key routes

- **Cannibalization risks will be mitigated by Dobrolet network planning and initial business model**
Network and Fleet: Strategy, Goals and Achievements

Shamil Kurmashov
Deputy CEO for Finance, Network and Revenue Management
Key Highlights

- **Wide domestic network strengthened by subsidiary** airlines’ complementary regional networks

- Focus on targeting **the largest and most attractive routes** in Russia targeting above market RPK / traffic growth and sustainable seat load factor

- Expanding on the **most profitable international routes** and selected additions of new routes

- **SkyTeam** and code share agreements are increasing presence on existing markets and opening up new markets

- **Profitability driven approach to expansion** via increasing frequency on existing routes and cautious approach to entering new routes

- **Fleet strategy implementation** laid solid **foundations for safe and cost effective operations**
  - Consistent fleet optimisation with focus on modern and reliable aircraft – Aeroflot is operating one of the most advanced fleets in Europe
  - Fleet optimisation and unification resulted in increased fleet utilisation and improved fuel consumption
  - In-house MRO capabilities sustaining high safety standards and reducing costs
  - Fleet financing decisions are based on ownership cost optimisation, while sustaining a modern and efficient fleet
Wide Domestic Network Providing Strong Footprint and Leading Market Positions

Summary Overview

- 43 domestic routes with an average frequency of 15.3 flights per week in 2013
- Sheremetyevo airport in Moscow is a key hub for domestic flights
- Other key regional hubs used by subsidiary airlines are St. Petersburg, Vladivostok, Rostov-on-Don and Sochi
- Strong growth of RPK and ASK as a result of acquisition of regional airlines in 2011, increasing demand for air transportation and Aeroflot sustaining its leading market share
- New Novy Urengoy route to be opened in 2014

Domestic Route Network: JSC Aeroflot¹ (Summer 2014)

Focus on growing market share on the largest and most profitable routes in Russia resulted in above market RPK / traffic growth and sustainably high seat load factor

¹ Excluding routes of subsidiary airlines.

Aeroflot Capital Markets Day 2014
Subsidiary Airlines Strengthen Domestic Network

Summary Overview

- Ongoing transfer of subsidiary airline operations under 100% operational management of Aeroflot Group
  - Rossiya Airline to be 100% operated by Aeroflot starting from April 2014
- Subsidiary airlines operating in regional markets are attractive on a stand-alone basis and provide Aeroflot with exposure to regional transit traffic
- Strengthening domestic and international network of Aeroflot Group
- Further integration of subsidiary airlines is expected to result in continuing optimisation of domestic network

Subsidiary airlines further strengthen Aeroflot’s dominance in the domestic market and complement Aeroflot’s network

¹ Vladavia is a small regional airfield operating in the Far East.
Rational Deployment of Capacity Across International Network

(y-o-y change, 2013 vs. 2012)

- **North and Central America**
  - PAX: 49.0%
  - RPK: 48.1%
  - ASK: 51.4%
  - (1.8) p.p
  - SLF

- **Europe**
  - PAX: 17.2%
  - RPK: 20.4%
  - ASK: 18.3%
  - (1.3) p.p

- **Middle East and Africa**
  - (21.9)% PAX
  - (22.2)% RPK
  - (20.7)% ASK
  - (1.6) p.p

- **Asia**
  - PAX: 10.3%
  - RPK: 13.1%
  - ASK: 12.1%
  - (0.7) p.p

- **North America**
  - Increased capacities on Rome and Belgrade routes
  - Marginal growth of capacities on selected routes

- **Middle East and Africa**
  - Reduced capacities on macro-sensitive and charter-heavy routes
  - Closure of routes to Damask, Hurghada and Sharm El Sheikh

- **Asia**
  - Increased capacities on Bangkok, Hong Kong and Seoul routes in high season
  - Increased frequencies on Guangzhou route

- **Aeroflot is targeting growth on the most attractive routes by increasing frequency and is opening selected new routes based on future profitability analysis**

- **International routes operated by subsidiary airlines complement Aeroflot Group’s international network and strengthen the company’s exposure to further growth of passenger traffic in and from Russia**
Profitability Drives Expansion

Comprehensive New Route Implementation Process

- Market Opportunity
- Competition / Commercial Rights
- 3-year Business Case / Financial Evaluation
- Finance and Investment Committee Approval
- New Network Point / Join the Dots
- Airport Negotiations / Operations Review
- New Route Sign-off
- Finalisation
- New Route Launch / Sales
- Performance Evaluation

Recent Success Story: Stuttgart and Bologna

Moscow – Stuttgart

- Market size estimate: ~97,080\(^1\) pax
- 73,345 P2P\(^2\) and transit pax in 2013
- Share of transit: 42.9%
- Operating profitability: 11.7%
- Aeroflot Group revenue contribution: $4.4m

Moscow – Bologna

- Market size estimate: ~99,110\(^1\) pax
- 71,556 P2P\(^2\) and transit pax in 2013
- Share of transit: 26.6%
- Operating profitability: 40.1%
- Aeroflot Group revenue contribution: $3.2m

- Major success on both lines with greater than anticipated demand and increased frequency as a result
- Target profitability reached within one year
- High transit passenger traffic and network contribution achieved

Profitability driven expansion via increasing frequency on existing routes and cautious approach to entering new routes

---

1 Source: MIDT Statistics for summer 2010 for Stuttgart and summer 2011 for Bologna, including P2P and transit passengers.
2 Point to point traffic
Aeroflot’s fleet strategy and its implementation over the last five years laid a solid foundations for safe and cost effective operations today.
Maintaining Modern Fleet – Among the Youngest in Europe

Undergone a major fleet transition since 2009 focused on highest safety standards, reliability, passenger comfort and cost efficiency

Maximising operating and financial efficiencies from Airbus, Boeing and Sukhoi aircraft platforms while maintaining healthy competition among suppliers

- 5.4 year average fleet age at JSC Aeroflot
- Among the youngest fleets in Europe and one of the most modern globally
- Ongoing fleet replacement programme targeting at maintaining average age of the fleet at 5-6 years for JSC Aeroflot

Consistent fleet and fuel optimisation focusing on modern and reliable aircraft means Aeroflot is operates one of the most advanced fleets among European airlines

Source: Airfleets

Excluding subsidiary airlines.

Aeroflot Capital Markets Day 2014
Improving Fuel Efficiency and Utilisation

Fuel Efficiency and Utilisation Overview

- Ongoing fleet expansion and modernisation
- Increasing share of new modern aircraft
  - New A320 with aerodynamic Sharklet wing-tips resulting in up to 4% fuel consumption improvement (supplied starting from 2014)
- Unification of subsidiary airlines fleet
  - Phase-out of B-737 (classic) and legacy Russian aircraft
  - Ongoing shift to 1-2 aircraft platforms per subsidiary will streamline operations and optimise cost
- Overall 30% increase in fuel efficiency since 2008
- Fuel utilisation improvements with 11.3% reduction in fuel consumption per ASK since 2009

Consistent fleet optimisation and unification resulted in improved fuel efficiency over the last 5 years

¹ Data presented for JSC Aeroflot.
**Optimised Fleet Maintenance and Repair**

**Fleet Maintenance and Repair Function Overview**

- Centralised maintenance and repair function with 3 divisions: Airworthiness Department, Aircraft Maintenance Department and Quality Control Division
- Strong team of c. 2,120 engineers, maintenance, logistics and support personnel
- Focus on in-house MRO services and outsourcing of major works
- Continuous development of in-house technical servicing capabilities for existing and new types of aircraft
  - Boeing 777, 737 and 767
  - Airbus 320 and 330 families
  - SSJ and other Russian aircraft
- Ability to perform selected in-house aircraft customisation in Sheremetyevo and selected regional airports
- Maintenance and repair services to c. 70 third-party customers
- Compliance with the highest safety standards

**In-house MRO services provide reliable and cost efficient services**

---

1 Data presented for JSC Aeroflot.

**Airworthiness Department**

- 90 engineers
- Highly skilled, ongoing training

**Aircraft Maintenance Department**

- EASA certified for Boeing and Airbus services since 1996
  - 603 EASA Certified staff
  - 459 EASA Authorised staff
- Highly skilled, ongoing training

**Maintenance/Repair Works – Labour Cost (2013)**

- Services to third parties: 0.5%
- Outsourced: 4.6%
- Customisation: 4.4%
- In-house: 90.5%
Improved Fleet Reliability and Utilisation

**Fleet Reliability Management Overview**

- High level of safety and reliability of fleet at competitive costs are key goals of the fleet maintenance and repairs function
- Regular Reliability Control Board meetings and action plans for each aircraft type
- Quality Assurance and Safety Management System aimed at ensuring consistently high safety levels
- High reliability and safety levels
- Ongoing efficiency improvement and cost reduction initiatives
  - Opening new MRO line stations
  - Extending expertise in maintenance and repairs of A320 and A330 families and B777 and B737 aircraft
  - Optimisation of personnel time
  - Roll-out of Onboard Network System
  - Roll-out of SAP R3 and AMOS

**Fleet Utilisation – A320 Family aircraft in 2012 (hours per day)**

Fleet Expansion Financed Using Operating Leases

Overview

- Financing structure allows for more flexible fleet composition
  - 67% under operating leases
- Aircraft acquisition financing decision driven by discounted cash flow analysis over life of aircraft
  - Residual value and cost of regular maintenance checks are key drivers of financing decisions – differentiated approach to short- and long haul aircraft
  - Flexible approach to maturity and other parameters of operating leases structured around maintenance periods (mandatory checks every 6 years)
- Targeting average age of 5-6 years for JSC Aeroflot and 10-14 years for subsidiary airlines by constant replacement of old fleet
  - Maximum aircraft age of 12 years for JSC Aeroflot and no second-hand aircraft
  - Maximum aircraft age of 18 years for subsidiaries
- Subsidiary airlines’ fleet financing improved under Aeroflot Group umbrella
  - Combining subsidiaries’ order books with JSC Aeroflot’s
  - Total savings of $42m on operating lease payments as a result of providing guarantee by JSC Aeroflot

Fleet Ownership Structure

- Business case driven financing decisions aimed at optimising ownership costs and sustaining a modern and efficient fleet
- Aeroflot’s approach and financing structure rolled-out at the level of subsidiary airlines

¹ Aircraft not in operation.
² Aeroflot is in negotiations with Boeing on reconfiguration of aircraft to increase capacity.
³ Excluding 4 Mi-8 helicopters and 1 An-24 aircraft.
Financial Overview

Shamil Kurmashov
Deputy CEO for Finance,
Network and Revenue Management
Key Highlights

- Over the recent years Aeroflot has achieved significant operational and financial improvements:
  
  - **Tripled the scale of operations** via organic growth and acquisition of regional airlines in 2011, which in turn successfully translated into **sustainable yield and RASK** as well as expanding network and market share
  
  - Actively focused on **cost efficiency**: employed a young and modern fleet, focused on labour force productivity and ongoing integration of subsidiary airlines
  
  - **Strengthened balance sheet** position by decreasing leverage and sustaining high liquidity

- Leading market position and increased operational efficiency, enabled Aeroflot to **deliver stable and competitive returns to shareholders**
Growing Revenue Units: Trend of a Decade

- Over the last decade, Aeroflot has tripled the scale of its operations via organic growth and acquisitions of regional airlines in 2011.
- Aeroflot achieved sustainable yield and RASK, as it expanded its network and market share.
Higher passenger traffic, network expansion and cost efficiencies have successfully translated into increased top line revenue and profitability.
Stringent Revenue Management Principles Underlying Sound Track Record

- Focus on increasing market share on the highest traffic routes domestically and internationally
- Rigorous analysis of potential expansion and opening of new routes
- Maintaining yield and RASK as a primary goal when growing market share and expanding to new markets/routes

Rational Deployment of Capacity Across Network

- Offering premium fares on routes with significant market share and competitive fares on new or underpenetrated routes
- Sophisticated software and tools for determining prices depending on type of passenger and timing of ticket purchase
- Continued product development for further market segmentation: classes of service, ancillary services and loyalty programmes
- Potential upside from regulatory permission to sell non-refundable tickets in 2014

Flexible Pricing Policy

- Wider and deeper domestic and international network of the Group creates added-value for customers (flight options, connections and convenience)
- Incremental revenue from regional markets and regional transit passenger traffic
- Gradual transfer of subsidiaries operations under management of Aeroflot to further improve revenue units

Adhering to stringent revenue management principles enabled Aeroflot consistently improve financial results
Continuous Quest for Cost Efficiencies

6.1% reduction in CASK since 2011

Reductions are sustainable and supported by a young and efficient fleet, highly productive labour force and ongoing integration of subsidiary airlines

</tbody>
</table>

1. Fuel
   - Continuous negotiations with fuel suppliers to achieve more competitive pricing
   - Active monitoring of fuel consumption

2. Labour
   - Focus on increased productivity
   - Optimising team structures to ensure no duplication of roles

3. Maintenance
   - Continuous negotiations with maintenance and repair service providers to achieve more competitive pricing

Aircraft / Traffic Servicing
- Decreasing the share of outsourced aircraft / traffic services in Sheremetyevo airport

SG&A
- Continued transfer of subsidiary airline operations under management of Aeroflot
- Launch of new software to increase administrative personnel productivity
- Stringent control of administrative costs
Aeroflot is achieving efficiency gains in fuel costs as new aircraft are put into operation, while old and less fuel-efficient ones are in the process of phase out.
Summary Overview

- Large Russian integrated oil companies are key suppliers at Sheremetyevo and regional airports in Russia
- Direct contracts with Shell, AirBP, Total, ExxonMobil, Eni, Chevron for fuel supplied in international airports
- 5-year contracts at Sheremetyevo airport with Gazpromneft and Rosneft with formula-linked pricing
- 1-year contracts with formula-linked pricing at 28 regional airports in Russia (no formula-linked contracts in 2012)
- Majority of fuel purchased in Russia (69% of volume) and almost all fuel at international airports supplied at formula-linked price
  - Jet fuel price = NW Europe (FOB Rotterdam) price x Discount x FX rate\(^1\) x 1.18\(^2\) + Storage / Fuelling / Supply fees (if any of these applicable)
- Active hedging of exposure to benchmarking price and FX risk
- Since January 2013, subsidiary airlines switched to Aeroflot’s fuel procurement platform, realising significant efficiencies
- Recent developments
  - Ongoing consolidation in the Russian air fuel supply market by large integrated oil companies
  - Continuing gradual shift towards formula-linked pricing

- Negotiations with fuel suppliers, change of payment terms and improvements in supply logistics resulted in $30m savings on fuel costs against budget in 2013

### Traffic Revenue / Avg. Airlines Headcount ($ '000 per employee)

- **2012**: 295
- **2013**: 321

### RPK / Avg. Airlines Headcount (m pkm per employee)

- **2012**: 3.09
- **2013**: 3.38

### PAX Traffic / Avg. Airlines Headcount (passengers per employee)

- **2012**: 1,139
- **2013**: 1,244

- **Sizeable improvement in labour productivity has resulted in increasing operational profitability**

Note: Presented headcount figures exclude employees of Aeroflot Riga, Sherotel, Aeromar and Aeroflot-Finance
3 High Quality of Maintenance – Leveraging Own MRO Facilities

Summary Overview

- Own MRO Facilities
  - Strong team of 354 qualified engineers and 1,665 technicians
  - c. 10 maintenance bases at Aeroflot and 12 at subsidiary airlines
  - EASA certification for Boeing and Airbus aircraft maintenance at JSC Aeroflot, Donavia and Rossiya
- 70 third-party customers at Aeroflot and 23 airlines at subsidiaries' level
- Extending scope of services provided to minimise outsourcing
- Improvement in labour efficiency results in more effective maintenance workflow for the key aircraft types (A320, A330 and B767 families)

Maintenance Man-Hour / Flight Hour Ratio (for Aeroflot JSC)

- Own MRO facilities enable Aeroflot to achieve optimal costs / results balance
- High quality maintenance improves fleet reliability and average flight hours per aircraft
Cost Optimisation via Electronic Purchasing Platform

Key Highlights

- Openness and transparency of purchasing procedures
- Proprietary Aeroflot (since 2010) and Sberbank’s electronic purchasing platforms
- Purchasing announcements published on Aeroflot’s website and website for procurement by the government and state-controlled companies
- 99% of purchases by volume through electronic platform
- Electronic purchasing platform increased average number of proposals from 2.26 in 2011 to 3.51 in 2013 (24.6% CAGR)
- Higher number of suppliers and increased competition resulted in cost reduction

Transperent electronic purchasing system open to new suppliers delivered cost optimisation

### Approach to Capital Investments

#### Summary Overview

- **Approach to aircraft replacement and acquisition**
  - Earnings/Cash flow generation potential
  - Discounted cash flow analysis over asset life

- **Focus on operating leasing**
  - Flexibility in returning aircraft to lessor or transferring it to subsidiary airlines
  - Ability to sustain a young and modern fleet

- **Ground facilities**
  - Development of ground facilities to match expanding fleet requirements. Recent projects entail second hangar for Orenair and fourth hangar for Aeroflot (in SVO)

- **Other investments**
  - Investing into non-aviation subsidiaries. Recent investments entail significant modernisation of food catering business (Aeromar)

- In 2014, capital investments\(^1\) are estimated to be c. $150m

Leading market position and increased operational efficiency enabled Aeroflot to continue delivering stable and competitive returns to shareholders

Market data as of Mar-2014.
Marketing Strategy: Customer Service Excellence

Mikhail Fandeyev
Marketing Director
Key Highlights

- **Aeroflot** captures growth *across domestic and international markets* by offering high quality services to a wide range of customers.

- Customer excellence *at all touch points* increases loyalty:
  - Extraordinary customer pre-flight experience is sustained by user friendly online environment, global customer offices network and customer support through a multi-lingual call centre available 24/7/365.
  - Superior ground experience is achieved through offering comfort and convenience to customers and constant focus on operational efficiencies.
  - Outstanding flight experience across all classes is built around wide selection of high-quality food and beverages, inflight entertainment programmes and connectivity.

- **Aeroflot Bonus programme** helps sustain customer loyalty.

- **Advertising campaigns** aimed at promoting services in Russia and *strengthening Aeroflot’s brand* internationally in a cost-efficient manner.
**Wide Product Offering Capturing All Customer Segments in Russia and Attractive Customer Groups in Global Market Niches**

**Improving customer experience and lowering costs through wider implementation of online services**
Pre-flight Experience – Offline Customer Offices

**Network and Call Centre**

### Customer Offices
- Wide network in major Russian cities and internationally
- Services provided in offices
  - Corporate, group and bonus ticket sales
  - Ticket sales on SkyTeam members’ and other airlines’ flights
- Ongoing optimisation of network (e.g. closing of two offices in Moscow)

### Network of Customer Offices
- 10 offices in Moscow and 1 in Sheremetyevo airport
- 44 cities across Russia outside Moscow
- 74 offices / 45 countries globally, ex. Russia

**Global network of customer offices supported by a multi-lingual call centre available 24/7/365 which contributes to customers’ superior pre-flight experience**

### Call Centre
- Toll-free dedicated lines available in 14 countries. Multi-language: English, French, German, Spanish, Italian, Japanese and Chinese
- c.270 lines in Russia
- 24/7/365 availability
- Services provided by call centre
  - Sale of tickets
  - Dedicated lines for Aeroflot Bonus Gold/Silver members, concierge service for Platinum members
  - Information services (schedule, tickets availability etc.)

### Call Centre Requests by Type

- General Inquiries 23%
- Booking / Payment by card / Special services 14%
- Inquiry on seat availability and fare calculation 18%
- Change / Refunds 9%
- Online registration and support 10%
- Transit / Baggage / IROPS 13%
- Others 13%
Improving Customers’ Ground Experience Through Operational Efficiency

Consistent Improvement of Ground Experience

- Consistent focus on and investment in operational efficiency resulting in better customer experience and cost savings
- Focus on optimising check-in and baggage flow processes
  - Registration kiosks in international airports and at Aeroexpress train stations
  - Baggage flow optimisation initiatives
- Grouping flights at Sheremetyevo Terminal D to ensure minimum security control and boarding time
- Offering business class domestic and transit passengers premium services at Aeroflot's lounge at Sheremetyevo D Terminal
- Faster and more streamlined connecting process for transit passengers following roll-out of new IT infrastructure, streamlined check-in and boarding procedures and training for front line staff

Sky Priority Programme

- Worldwide roll-out of programme since 2012; Aeroflot joined in 2013
- Currently available in 85 destinations
- Priority check-in, baggage drop-off, security and boarding lines
- Ensuring consistent quality of service and long-term loyalty of priority customers

Efficiency and Quality

- Wide presence of registration kiosks
- Priority check-in
- Baggage drop-off

Comfort and Security

- Business Class Lounge
- Boarding

- Improving operational efficiency through faster and more streamlined processes
Offering Superior Flight Experience to All Customers

Business Class
- High standards of comfort and service, individual approach, maximum choice and attention to details from highly-trained multi-lingual cabin crew
- Separate cabin with comfortable spacious seats on A-330 and B-777 (full flatbed on A300-300 and B-777)
- Exquisite food by world class chefs with multi course gourmet meals
- Special comfort – premium quality travel kit, pillows and blankets
- Entertainment system: in-seat back display on A330 and on B777 and touch screen digEplayers on certain flights on A319/320/321

Comfort Class
- Offered on B777-300ER
- Separate cabin with enhanced seating
  - Spacious and comfortable seats with increased row space
- Wide menu options
- Travel kits, blankets and pillows
- In-seat back 10.6” display entertainment system

Economy Class
- Optimum level of comfort and service
- Ergonomic seats, blankets and pillows
- In-seat back 9” display entertainment system (A330 and B777)

- Superior products across all classes for all customer segments
Industry Leading Inflight Environment

**Food and Beverages**
- Industry-leading inflight menu by quality and variety
  - Long-haul flight menu ranked No.2 by SkyScanner
- Menu for business class passengers developed by restaurant chefs since 2011
- 15 types of food offerings to suit dietary, medical and religious preferences
- Wide selection of wines from Europe and the new world
- Own catering production subsidiary to control quality and cost

**Inflight Entertainment**
- Available to all passengers on long-haul flights and business class passengers on majority of flights
- One of the largest media content libraries among European airlines, updated every two months
  - 166 international and Russian movies, including the latest releases and 80 Oscar-winning films
  - TV series and shows
  - Children’s channel
  - News
  - Sport
  - Music and audio books

**Inflight Connectivity**
- Onboard Wi-Fi
  - Launched jointly with OnAir in Jan 2013
  - Available on 15 A-330 and 5 B-777
  - Roll-out on additional 7 A-330 and 4 B-777 aircraft by the end of 2014
  - “Twice for two” promotion campaign in November-December 2013

- Outstanding flight experience built around a wide selection of high-quality food and beverages, inflight entertainment and connectivity
Aeroflot Bonus Frequent Flyer Programme

Programme Overview
- Marketing campaigns to boost traffic on new and under-utilised routes (e.g. selected domestic and international routes in summer 2013), joint promotions with partners
- More than half of bonus miles awarded by programme’s non-aviation partners
- Recent developments: SMS notifications, ability to upgrade service class for bonus miles, purchasing tickets for bonus miles via mobile application, etc.
- 2014 initiatives: platinum level introduction (concierge service), renewal of corporate style and logo

Selected Earn Options
- Flights with Aeroflot and selected SkyTeam alliance members
- Upgrade of service class at Aeroflot
- Hotels
- Car hire
- Restaurants

Bonus programme aimed at retaining customers and increasing their loyalty

**Russia**

**International**

- Targeted marketing and advertising campaigns aimed at promoting services in Russia and strengthening Aeroflot’s brand internationally in a cost-efficient manner
Sales Organisation

Dmitry Saprykin
Deputy CEO for Sales and Property
Key Highlights

- Aeroflot sales both in Russia and internationally demonstrated **c. 25% CAGR since 2011**

- **Ongoing shift towards a more cost efficient online channel** model mainly by reducing the share of agent sales
  - Online sales have been growing rapidly, reaching c. $1.2bn in 2013 (18% of total sales), and are expected to grow further

- Ongoing **optimisation across all sales channels**
  - Significant savings as a result of new agents' commission structure implementation
  - Optimisation of international sales offices resulted in significant sales growth

- Aeroflot's sales function improvement resulted in **above market growth of operating and financial results**
Wide Sales Network in Russia and Internationally

Aeroflot Passenger Tickets Sales ($m)¹

Domestic Sales by Region (2013)

International Sales by Region (2013)

- Aeroflot ticket sales demonstrated c. 25% CAGR since 2011, showing similar growth rates both in Russia and internationally

¹ Total sales of Aeroflot and subsidiaries flights operated under SU code, excluding clearing payments to other airlines and excluding charter flights in Russia.
In recent years Aeroflot’s sales structure has been shifting towards a more cost efficient online channel

Including sales via own customer offices and call centre.
## Aeroflot individually incentivises agents using tools best suited for each agent segment

- **Europe**
  - Local sales managers in major European countries hired (previous experience with European, North American and other airlines)

- **Hiring of sales managers with local market knowledge, conducting detailed market analysis and roll-out of individual approach to the largest agents resulted in 15% sales growth in Europe in 2013**

- **Results**
  - Sales growth +c.15% or +c.$100m in 2013
Constantly Expanding Direct Sales via Online Platform

Online Channel Development Areas

- Online platform development
  - Launch of new services and functionality
  - Development of online services suite ("my account manager", Aeroflot Bonus services, online check-in, etc.)
  - Launch of locally-adapted websites
  - Mechanisms to support all popular payment methods
- Online sales promotion
  - Rapid development of tools to optimise and promote Aeroflot’s website and mobile apps
- Improvement of the conversion rate (sales vs. visits)
  - Redesign of the website with focus on conversion
  - Cross-selling of ancillary services
- Client analysis and targeting
  - Introducing integrated analytics and forecast software
  - Micro-targeting of clients with unique offers

Share in Total Sales, (%)

- 2010: 13%
- 2011: 14%
- 2012: 17%
- 2013: 18%

40% CAGR

Online sales have been growing rapidly in recent years, reaching c. $1.2bn in 2013 (18% of total sales), and are expected to grow further.
Other Improvements Within Sales Channel

Agents
- Hiring experienced sales managers with local knowledge in large international markets
- Increasing awareness and familiarity with Aeroflot and its products among key international agents (visits, presentations, fam-trips, etc.)
- Signing incentive contracts with key agents
- Providing net fares for specific agent segments (tour operators, ethnic agents, etc.)
- Introducing joint budget for marketing events with agents
- Conducting regular promotions and providing special offers to online agents

Corporate Clients
- Establishing a dedicated Corporate Clients Department
- Introducing corporate sales KPIs
- Optimising discount system, terms and conditions for corporate clients targeted at increasing Aeroflot’s share of wallet
- Initiating and developing direct relationships with corporate clients
- Introducing corporate loyalty programme targeted at small and medium enterprises in Russia

Online
- Expanding alternative online payment methods
- Strengthening cooperation with travel metasearch engines (Kayak, Skyscanner, etc.)
- Develop and improve discounted coupon programme
- Introducing ‘call from the website’ service

Continuous optimisation across all sales channels delivers a positive impact on sales growth
Aeroflot’s sales function improvement resulted in above market growth of operating and financial results.

</tbody>
</table>

Both board members and management play an active role in corporate governance and complement each other in developing and implementing Aeroflot’s strategy for the benefit of all shareholders

¹ In accordance with the definition of independency governance as per Russian corporate law and code of corporate conduct.
Closing Remarks

Giorgio Callegari
Deputy CEO for Strategy and Alliances
Charting Our Course into the Future

- Aeroflot is Russia’s #1 carrier and a market leader with a viable business model
- Aeroflot is well positioned to benefit from further passenger traffic growth, ongoing market consolidation and modernisation of aviation infrastructure in Russia
- Multi-brand strategy to serve a broad range of customer segments, capture growth across all market niches and sustain market leadership
- Innovation programme aimed at introducing the newest processes, technologies and solutions to optimise operations and enhance customer experience
- Wide domestic and international network covers the most attractive destinations – further strengthening Aeroflot’s position on existing routes and business case driven additions of selected new routes
- Customer service excellence across all touch points aims to differentiate our product and increase customer loyalty
- Strong and profitable revenue growth from higher passenger traffic and sustainable yields and RASK
- Increased operational efficiency and margins translating into improved profitability and sustainable returns to shareholders
Appendix: Supplementary Materials
In the Summer 2014 season, Aeroflot Group will operate flights to 141 destinations in 54 countries (incl. Russia)

Aeroflot and its partner airlines under code share agreements will operate 356 destinations in 66 countries

Transit passenger traffic of JSC Aeroflot in the Summer 2014 season is expected to increase by approximately 17% compared to the Summer 2013 season, reaching c. 5.9m passengers (40% of total passenger traffic)

- In 2015-2017, 85 new aircraft will join the fleet
- By the end of 2014, Aeroflot plans to phase out Il-96, majority of B-767 and A-320 family aircraft, for which the lease term is expiring

1 Excluding 4 Mi-8 helicopters and 1 An-24 aircraft.
Aeroflot Group Structure

- **Ongoing subsidiary airline integration and streamlining of the corporate structure**

**Note:** Aeroflot Group consolidates all entities: JSC Aeroflot and all subsidiaries

1. Previously was operating as SAT Airlines. In January 2014, 49% stake disposed to Sakhalin regional administration.
2. Legal entity established, ongoing preparatory work before launch.

---

Aeroflot Capital Markets Day 2014
Aeroflot Shareholding Structure and Privatisation Update
